Consulting Engineers

Now includes Smart Water Valve

As Part of All Core & Shell Designs

Their Firm Produces

October 2019

Scott Kramer EVP says their firm will now include the following language in all designs moving forward

Wylie Engineering has added SmartWaterValve to their template for all designs produced by their office, with the following language on all prints:

This project will include a Smart Water Valve on each water line coming from a municipal water meter in order to reduce the amount of air being incorrectly read as additional water by all city volumetric water meters. Information including: how they work, design specifications, dimensions, how to purchase, pricing, engineering studies validating effectiveness installation instructions references guaranty/warranty are at www.SmartWaterValve.com
